# PRIX GALIEN USA

NOVEMBER 7, 2024, NEW YORK CITY

RECOGNIZING INNOVATION THAT  
IMPROVES THE HUMAN CONDITION

**GF** THE GALIEN FOUNDATION

PRE-EVENT & ON-SITE RESOURCES FOR JOURNALISTS

Galien Foundation events are conducted fully on the record, and we welcome and invite members of the media to participate as engaged stakeholders via onsite discussion, as well as via social media, and to report on proceedings and outcomes.

We certainly appreciate coverage of our events, but our priority is to help you explore and uncover today's key issues and connect with the people and diverse organizations we bring together that make the world a healthier place.

To help facilitate your engagement with our speakers and stakeholders, we are delighted to work with you in the lead-up to our 2024 Forum and Ceremony on:

- > Arranging interviews with key speakers and stakeholders
- > Reserving private spaces for on-site interviews
- > Sharing our latest programs and speaker lists
- > Providing hi-resolutions imagery (including photos of people, spaces, logos, etc.)

Sharon Stone at the Galien Golden Jubilee Awards Ceremony ( Oct, 27)

THE GALIEN FOUNDATION FOSTERS, RECOGNIZES AND REWARDS EXCELLENCE IN SCIENTIFIC INNOVATION THAT IMPROVES THE STATE OF HUMAN HEALTH.

OUR MISSION

The Prix Galien Award recognizes outstanding achievements in improving the global human condition through the development of innovative drugs and other treatments. The Prix Galien was created in 1970 in honor of Galien, the father of medical science and modern pharmacology. Worldwide the Prix Galien is regarded as the equivalent of the Nobel Prize in biopharmaceutical research.

The Prix Galien is more than an award: it is a movement with a mandate to foster, recognize and reward excellence in scientific innovation to improve the state of human health. Building on an unrivaled network of top biomedical scientists including Nobel Laureates in medicine, the Prix Galien manages an independent, cross-functional and geographically diverse program of events and sponsorships to brand "the best of the best" in new medicines and diagnostics. Our scope is global, and our commitment to progress in medicine is both measurable and concrete. Our members express this through the establishment of productive relationships to build lasting bridges between the commercial research enterprise and local communities engaged in public policy, science, finance, academic research and the media.

In addition to recognizing advances in promising therapies, the Prix Galien's annual Roy Vagelos Pro Bono Humanum Award for humanitarian achievements brings a unique focus to the intersection between science, business and politics. The outcome we seek is guided by the synthesis principle that underpins the conduct of science itself: successful innovation where financing, physical assets, knowledge and skills are combined from many sources to move new ideas quickly "from the bench to the bedside," on behalf of patients everywhere.

P. Roy Vagelos, Prix Galien USA Committee Chair (2012-2017); retired Chairman & CEO, Merck & Co., Inc. was the first recipient of the Pro Bono Humanum Award for his historic decision to donate the drug Mectizan to more than 530 million people in 34 countries to treat and prevent river blindness.

A TRULY GLOBAL PROGRAM PRESENT IN 15 COUNTRIES\*

Our program includes a review of contributions from a new generation of innovators representing diverse sectors in health. Our mission is to advance cross-cultural contacts and harmonize regulation, internal business processes, new information technologies and public-private partnerships to remove barriers to the commercialization of good medicines and expand across to these benefits to all who need them.

\*Africa, Belgium, Canada, China, France, Germany, Greece, India, Italy, Netherlands, Poland, Russia, Spain, Switzerland, United Kingdom and the United States.

# THE MEDAL BY ALBERT DE JAEGER

**T**he Prix Galien medal was designed by Albert de Jaeger (1908 – 1992), laureate of the Premier Grand Prix de Rome architectural prize. De Jaeger designed medals for prominent figures such as Pope Pius XII (at the Villa Medici, 1937) and Pope Jean-Paul I, Presidents Dwight D. Eisenhower and John F. Kennedy, distinguished military leaders including Marshals Leclerc, Koenig, Montgomery, Marshall and Joukov; the Weizmann Institute, as well as numerous artists, literary figures and prominent personalities such as Sacha Guitry, Marcel Proust, Henri de Montherlant, Paul Harris, a number of Nobel Prize laureates, the Empress of Iran SA Farah Diba, Princess Grace of Monaco, and others...

De Jaeger is also the architect of numerous outstanding monuments in France and throughout the world.

### The Prix Galien Golden Jubilee:

2022 was a landmark year celebrating 50 years of progress in recognizing excellence in biopharmaceutical and med tech innovations to improve the human condition. As a special feature, our 50<sup>th</sup> Golden Jubilee year honored the “global best of the very best” in: A- Pharmaceutical; B- Biotechnology; C- Orphan and Rare diseases; D- Vaccines; and E- Medical technology products. Eligibility were drawn from the 250 products awarded the Prix Galien by our 14 member-country chapters between 1970 and 2019, developed by more than 80 innovative companies, most of whom continue to bring new therapies for today’s patients with unmet medical needs.

The Galien Forum and Prix Galien USA Ceremony took place on **October 27 in New York City** at the Alexandria Center for Life Science and Museum of Natural History, respectively. During the Ceremony, we also announced **the laureates** for the “Awards of the Jubilee” – which will be selected by all past and present Committee members across the globe.

**The Golden Jubilee Short list** was announced on December 11, 2021 **in Dakar** in the presence of the President of the Senegalese Republic, H.E. Macky Sall, alongside many African heads of state and ministers of health and/or environment, the WHO Director-General as well as hundreds of scientists and industry and innovation leaders.

Under the sponsorship of the government of Senegal and the WHO Regional Office for Africa, the Prix Galien Africa is our first truly region-wide initiative. It stands as a living tribute to the vision of Foundation co-founder, 1986 Nobel peace laureate Elie Wiesel, who believed in medical innovation not only as an industrial policy asset but as a source of social progress, where private enterprise and public engagement combine to deliver a greater

public good – health equity and access for all. The best locale to pursue our mission is the African continent, whose young population is destined to double to 2.5 billion people by 2050. According to the World Economic Forum, early-stage entrepreneurial activity is nearly 15% higher in Africa than the global average – yet while the continent is today home to 11% of the world’s population, it accounts for a mere 1% of total health spending and carries a crippling 25% of the global disease burden. Taken together, these statistics reveal the progress inherent in what a few years will be the world’s youngest and potentially most productive population, but whose prospects depend on more investment in health care as the key driver of development.

Our diverse geographic reach. The inauguration of the **Prix Galien India in 2024** represents a significant milestone, reflecting the Galien Foundation’s mission to bridge the gap between the Global South and Western countries. This landmark event underscores the Foundation’s commitment to recognizing and fostering scientific innovation across diverse geographical regions, ultimately contributing to global health advancements. Through initiatives like this, the Foundation continues to build upon its legacy of promoting excellence in pharmaceutical research and development worldwide. Our diverse geographic reach is evident with the **International Prix Galien Awards**, which launched in 1990, and is conducted every two years to highlight the “best of the best” in research that brings dividends to patients across geographies with differing health needs. This year to be held in **Rome on June 20, 2024**. This desire to make biopharmaceutical and med tech innovation a global endeavor, bringing progress to patients in all corners of the world, will now be a key priority for the Prix Galien community going forward. We invite all communities with a commitment to the conduct and promotion of life sciences innovation to contribute to this important work.

# PRO BONO HUMANUM LAUREATES SINCE 2007

Presented at the Ceremony, the Pro Bono Humanum Award recognizes exemplary and innovative efforts in improving the human condition. This special award was presented by the late and beloved Elie Wiesel, in presence of the Prix Galien USA Committee. The Pro Bono Humanum Award was renamed the Roy Vagelos Pro Bono Humanum Award in 2017 in recognition of his decades of leadership in improving the state of human health through medicines innovation.

**2022 Stanley Crooke**  
nLorem Foundation

Dr. Crooke is recognized for being among the first in industry to make a commitment to open science a key element of the modern R&D enterprise and to embrace the principle that even patients with the rarest of afflictions deserve the best talent and expertise our R&D industry can offer.

**2019 Jim and Marilyn Simons**  
The Simons Foundation

In recognition of their proactive support of basic scientific research undertaken in the pursuit of understanding the phenomena of our world, often including research by scientists in the early stages of their careers, a new collaborative

funding model to facilitate cross-disciplinary breakthroughs, and efforts to inspire emerging and current philanthropists to dedicate a portion of their philanthropy to basic science.

**2017 Jimmy Carter**  
Former U.S. President & Co-Founder, The Carter Center

For playing a leadership role in the elimination of river blindness in four of the six Latin American countries where it was endemic and halting the disease's transmission in several locations in Africa where more than 99 percent of the global cases exist.

**2020 Dr. William H. Foege**

In recognition of this role in building the global strategy that resulted in the eradication of this smallpox virus in 1980, a success that helped foster higher rates of immunization against many other infectious and communicable

diseases throughout the developing world.

**2018 Bill and Melinda Gates**  
Bill & Melinda Gates Foundation

In recognition of their extraordinary work championing scientific and technological innovation to improve life for the world's poorest people.

As co-chairs of the Bill & Melinda Gates Foundation, they have catalyzed unprecedented progress in global health, poverty reduction, and public education in the U.S.

**2023**

**Mae C. Jemison, M.D.**  
1<sup>st</sup> Woman of color in Space

In offering this recognition, our committee of distinguished scientists and Nobel laureates cites your exceptional Scientific Achievements. As a physician, engineer, and former NASA astronaut, you have demonstrated excellence in the fields of medicine and space science. For instance, your groundbreaking research aboard the Space Shuttle Endeavour in 1992 advanced our understanding of human physiology and the effects of space travel on the human body, leaving a lasting impact on space exploration. Moreover, beyond your space career, our committee acknowledges your tireless Medical Advocacy efforts. Your commitment to promoting diversity in STEM fields and inspiring young students, particularly from underrepresented communities, has been truly commendable. Your mentorship and advocacy for science education and healthcare access make you a notable figure in the medical community, empowering future generations to pursue careers in science and medicine.

For their accomplishments in converting basic science into new preventive vaccines and novel treatment therapeutics to combat the COVID-19 virus. The award highlights the success of these companies in partnering to speed novel vaccines and antibody drug combination to emergency use candidates to regulatory approval and distribution, resulting in the timely mitigation of a pandemic that has caused immense economic damage and human suffering worldwide. All told, we believe the innovative medicines industry has done more in partnership to defeat the pandemic than any other institution, public or private. This is a record that deserves recognition, which is precisely the Galien community's global mission

**2016**

**Paula S. Apsell**  
Executive Producer, PBS NOVA series & Director, Science Unit, WGBH

For turning great science into a human story, showing that scientific literacy is society's first line of defense against

the destructive forces of fear and ignorance that challenge further progress in human health.

**2014**

**Dr. Bernard Kouchner**  
Co-Founder, Doctors Without Border & Former French Minister of Foreign and European Affairs

In recognition of his role in the creation, from amongst French doctors, this group of "Doctors Without Borders"

who have lent the modern field of humanitarian medicine both legitimacy and worldwide acclaim and for his fieldwork that has nurtured and developed, not only among public opinion but also within various governments, the notion of the universality of humanitarian action and the concept of the Non-Governmental Organization.

**2012**

**GALIEN FORUM**  
 NOVEMBER 7, 2024 - 7:30 AM  
 ALEXANDRIA CENTER FOR LIFE SCIENCE  
 NEW YORK CITY

The Galien Forum, held every autumn at New York's Alexandria Center for Life Sciences since 2010, offers a full day of dynamic presentations and spirited discussions with top scientists and industry researchers who offer perspectives on the most significant challenges in the global burden of disease and highlights the latest research and clinical pathways toward diagnosis, treatment, and cure.

Our 900 attendees represent the top executive and thought leadership from academic research, industry, government, the regulatory community, patient organizations, international organizations, and the media. Time and again, Forum participants praise the caliber of the speakers and their fellow attendees, the quality of the panel discussions and presentations, and the recognition of industry's critical role in creating life-saving innovations.

These events represent peer-to-peer exchange with a public purpose, featuring unique opportunities to connect with a diverse range of people, organizations and interests from professional and scientific groups, academia, governmental organizations and patient associations, non-profit organizations and the media.

## PRIX GALIEN HALL OF FAME

SINCE 1970

The Prix Galien Award recognizes outstanding achievements in improving the global human condition through the development of innovative drugs and other treatments.

The Prix Galien was created in 1970 in honor of Galien, the father of medical science and modern pharmacology.

Worldwide, the Prix Galien is regarded as the equivalent of the Nobel Prize in biopharmaceutical research.
