

PRIX GALIEN ECOHEALTH AWARD

Recognizing Excellence in Environmental and Global Health Innovation

CHARTER

The EcoHealth and Environmental Innovation Prix Galien Award honors groundbreaking advancements in environmental science, sustainability, and human health. As climate change, biodiversity loss and air, soil and water pollution increasingly impact global well-being, this award acknowledges transformative innovations that improve planetary and public health.

A New Era of Innovation for a Healthier Planet

Building on the legacy of the Prix Galien, long celebrated as the highest distinction in life sciences and pharmaceutical research, the EcoHealth and Environmental Innovation Category recognizes innovative technologies that protect ecosystems and foster sustainable health solutions. This award champions efforts that bridge scientific excellence with ecological stewardship, reinforcing the critical role of environmental sustainability in global health.

Award Criteria

The EcoHealth and Environmental Innovation Prix Galien Award seeks to recognize achievements in:

- Sustainable Health Solutions—Innovations that reduce environmental harm while enhancing public health outcomes. This includes renewable energy, water conservation, and innovations that address net zero emission goals.
- Climate-resilient health: Strategies and technologies that mitigate the health effects of climate change, air pollution, infectious diseases and health risks due to extreme weather or temperature.
- Biodiversity and Human Health – Research guarding the life-sustaining link between ecological preservation and disease prevention.
- Green Pharmaceutical and Biotech Developments – Sustainable drug manufacturing, waste reduction, and eco-friendly biomedical advances.

Who Can Apply?

The Prix Galien Award in EcoHealth and Environmental Innovation is open to:

- Academic and research institutions
- Biotechnology, pharmaceutical, and environmental health companies
 - Private equity organizations and public and private partnerships
 - NGOs and governmental organizations driving innovation
- Startups and entrepreneurs pioneering sustainable health solutions

A Call for Visionaries

As the world grapples with escalating environmental challenges, this award amplifies the voices and innovations that lead the way in safeguarding planetary and human health. The EcoHealth and Environmental Innovation Prix Galien Award recognizes those who harness science, technology, and policy to create a healthier, more sustainable world.

Join us in celebrating those who shape the future of global health and environmental resilience.
